

## Quality Policy

Our mission is to create the world's best batteries, essential for the evolving future of transportation. This is an important role we take seriously - as we supply one in three batteries for vehicles around the world.

Our focus on quality encompasses all our processes from idea to delivery. We strengthen our performance through the evolution of systems, standards and tools as we continually challenge the status quo.

The commitment of every employee to excellence ensures our continued industry leadership, customer loyalty, satisfaction of all interested parties and profitable growth.

This policy outlines the Quality Principles of Clarios, its subsidiaries and its consolidated joint ventures.

## Operating Principles

- *Our people make the difference:* Quality performance is a direct result of employees taking active ownership and accountability in quality related matters.
- *We are committed to quality:* We honor our commitments with courage and integrity.
- *We embrace a customer-centric culture:* Our success is measured by the exceptional quality of our products, services and partnerships we provide our customers.
- *Our principles mean we do things the right way:* Compliance with applicable customer and other interested parties' requirements, regulations and internal standards is the foundation from which we build.
